

# Anaconda Download and Installation Instructions

1. Go to <https://www.anaconda.com/download/>.
2. Select the operating system you are working with.
3. Download the Python 3.6 version.
4. Follow the instructions for installation (Windows or Mac).
5. For Windows
  - a. Find and open “Anaconda Prompt” on your computer.
  - b. Type “python” and hit enter.
    - i. Something like this should appear (it will NOT be exactly the same as this):

```
(base) C:\Users\David>python
Python 3.6.3 |Anaconda custom (64-bit)| (default, Nov 8 2017, 15:10:56) [MSC v.1900
64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license" for more information.
>>>
```

- c. Congrats. You have successfully installed the Anaconda distribution of Python.
6. For Mac
  - a. Find and open “Terminal” on your computer.
  - b. Type “python” and hit enter.
    - i. Something like this should appear (it will NOT be exactly the same as this):

```
Dauids-MBP:~ davidmyers$ python
Python 3.6.4 |Anaconda custom (64-bit)| (default, Dec 21 2017, 15:39:08)
[GCC 4.2.1 Compatible Clang 4.0.1 (tags/RELEASE_401/final)] on darwin
Type "help", "copyright", "credits" or "license" for more information.
>>>
```

- c. Congrats. You have successfully installed the Anaconda distribution of Python.
